

KALDET All Weather Stain

No. 281

- Wetterlasur
- Lasure Intempéries
- Lasura para intemperie
- Velatura resistente alle intemperie
- Værbeskyttelse

Protection regardless wind and weather

KALDET All Weather Stain is a hydrophobic and thereby vapor permeable stain, which is suitable for the treatment of all exterior wooden surfaces. The only exceptions are walking areas such as terrace and balcony floors.

KALDET All Weather Stain reinforces and deepens the natural color of the wood grain, dries in accordance with German Industrial Standard (DIN) 53 160, fast to perspiration and saliva and is applicable by the usual techniques such as painting, spraying and dipping. In doing so the stain is applied in two to three coats at temperatures above 12°C (53°F) on dry wood, after it has been primed with a LIVOS product. In order to obtain a protection against blue-staining fungi, we recommend priming using ADAO External Primer No. 259. For oak and chestnut use LINUS Penetrating Oak Priming Oil No. 233.

For more information please refer to the Technical Data Sheet which can be found on our website: www.livos.co.uk. Do you need a personal consultation or do you have questions about our products? Then contact us via our hotline: **+49 (0) 5825-8830**.
